Traditional Funeral

A Traditional Funeral as we have known it for many years is generally defined as one in which the deceased is present for viewing. Whether the service is at a church or in our chapel and followed by a cremation and/or a burial.

Modified Traditional Funeral

This service is essentially the same as our traditional funeral service. The difference is the length of the visitation. The visitation period, with the deceased present for viewing, is only on the day of the funeral. This type of service is suitable for families wishing to have visitation, service and interment or cremation all in one day.

The caskets listed are those generally available. Additional options are available upon request.

Minimum requirements for a casket:

For burial: The least expensive wood casket is suitable and is required by most cemeteries' by-laws for interment, in the interest of the health and safety of the workers involved in the interment process. A metal casket may also be used for burial. A growing number of cemeteries in Ontario offer "green" burials, which may consist of interment of a body without a casket. Since there is no legal definition for a "green" burial, it varies from one cemetery to another. For more information, please speak with one of our funeral directors, or visit www.greenburialcanada.ca.

For cremation: A body must be presented to the crematorium in a rigid, leak-proof casket that is made of a combustible material, such as wood or cardboard. Caskets containing non-flammable, hazardous material or chlorinated or fibre-reinforced plastic, other than incidental metal, cannot be used for cremation. We offer a selection of inexpensive caskets that are suitable for cremation.

Rental Casket

The following casket is available for rent. Rental caskets consist of the outer shell, which has been used before and may be used again, and the container insert, which is replaced for each use. It is required to purchase a casket (the insert) to be used for the final disposition of the body at a fee additional to the rental price.

Vaults

Outer burial containers listed below are for standard adult size caskets. Oversize vaults are available to accommodate plus-size caskets. Price includes grave set up and lowering device.

You do not have to purchase a vault unless the Medical Officer of Health has made the use of vaults and grave liners mandatory in the entire cemetery. A cemetery operator may designate a specific area in the cemetery where vaults or grave liners are required; however, the operator must have another area where vaults or grave liners are not required, so that consumers have a choice. A vault or grave liner may be recommended when there are environmental conditions such as poor drainage, or for practical or aesthetic reasons.
